**(54) Mobile terminal unit with improved operability in viewing mail**

(57) A mobile terminal unit configured (100) to be foldable includes first (8) and second (9) display portions arranged so as to be located on an inner side and an outer side of the mobile terminal unit respectively when it is folded. When a mail arrives, a title of an unread mail is shown on the second display (9) portion located on the outer side of the mobile terminal unit (100) when folded. A body of the mail is displayed on the first display portion (8) or the second display portion (9) in succession to display of the unread mail with its title, by operating a scroll key provided on the inner side (121) and the outer side (13) of the mobile terminal unit when folded, or by unfolding the folded mobile terminal unit.
